

KÜNDIG GROUP

«Sustainability through domestic production»

Dried onions cultivated in Germany

The Kündig Group vouches for quality, sustainability and traceability in the cultivation and processing of onions. Underscoring that claim is our newly built onion processing plant in Alteglofsheim/Bavaria. As a result, we offer customers a single-source solution for the cultivation, harvesting, automatic peeling and cutting as well as drying of domestically grown onions, and this by means of the latest technology, short transportation routes and the highest degree of efficiency.

Product range:

Onions and roasted onions, available according to the customer's desire in sliced, diced, granulated or powdered form and in either conventional or Bio quality.
