

# Kündig Bio Agrarprodukte®

Cereals | Legumes | Oilseeds and oil cakes

Worldwide, the share of organic food is increasing at a rapid pace, especially in Europe. The Kündig Group has picked up on this trend early on and has consistently built and expanded its organic commitment since the 1970s. Today, organic products account for more than 50 percent of all goods traded by Kündig. Today, in order to further expand our competence when it comes to organic products, we have founded the Kündig Bio Agrarprodukte GmbH in Berlin.

**IMPECCABLE ORGANIC QUALITY** All organic cereals, legumes and oilseeds traded by Kündig are 100 percent traceable to their specific producer. The producer or producers are disclosed to each customer at the latest upon delivery. With us, organic quality is never anonymous.

At Kündig, not only the raw materials but also the processed oil cakes and pellets can be traced back to the field where they originated. Our employees visit each producer several times a year. We work with field surveys as well as soil analyses and systematically review our goods before delivering them to our customers. Furthermore, we perform volume plausibility checks to ensure that the quantity traded by producers is plausible with regard to the quantities harvested. In addition to following the EU directives on organic produce, producers are monitored for the higher requirements of the relevant associations as well as for compliance with social standards.

**SECURITY OF SUPPLY** Kündig offers all common types of cereals, oilseeds and legumes as raw material loose by truck (tipper 25t or big bag approx. 22t) freely delivered to your production site or warehouse. We deliver the goods in one lot at the time of your choice or, alternatively, take over the storage and maintenance for you and deliver the tonnage you need just in time, anytime during the year.

Are you interested in the long-term security of supply for raw material over several years of harvesting with goods that meet your quality requirements? Please do not hesitate to contact us – we offer one-year and multi-year concepts across all types of crop, in every quality and every scale. Moreover, we are able to offer cereals suitable for diet products, gluten-free products as well as aflatoxin-free cereals by means of special cultivation, the selection of appropriate producers, comprehensive analysis or special processing.

# Kündig Bio Agrarprodukte® product range
